## Israel's Annual Report for 2009 on Trade in Species Listed in the Appendices of The Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES)

Prepared by:

Simon C. Nemptsov for Israel's Scientific Authority, [simon@npa.org.il](mailto:simon@npa.org.il)  
and Eti Sabag and Merav Levi for Israel's Management Authority, [u.achifa@npa.org.il](mailto:u.achifa@npa.org.il)

This report consists of two tables of data from Israel on imports and exports/re-exports of species listed in the appendices of the CITES convention, for the year 2009, prepared in accordance with Article VIII, paragraph 7 (a) of the Convention, following the Guidelines for the Preparation and Submission of CITES Annual Reports (Notification to the Parties No. 2010/013 of 17 June 2010).

Israel's trade policy necessitates an import and export permit from the Israel Nature and Parks Authority (INPA) for all wildlife and for all protected species imported into the country (even non CITES-listed species). In addition, the INPA issues official CITES permits for the import of CITES Appendix-I listed species, and for the export or re-export of all CITES-listed species. Israel also has certain stricter domestic measures regarding trade in wild flora and fauna, which were sent to the Parties in Notification No. 2004/025 on 30 April 2004).

This annual summary consists of data on the actual quantity of specimens imported and exported (except for corals and flora, see below). The data in the tables were provided by the permit-holders and were approved by INPA inspectors.

### **Imports**

The table of Imports includes all permits issued for the import to Israel of CITES-listed species for which specimens were actually imported; however the quantity of the Corals and Flora (plants) in the table is estimated. The table includes a description, the quantity actually imported, the ISO code for the country exporting to Israel, the number of the Israeli import permit issued by the INPA, and the

codes used for the Purpose and Source (see below). For the imports of corals to Israel details of the species imported or country of origin are not always listed. This is due to the practice whereby imports to Israel of live coral colonies for commercial purposes are done by importers who are issued an INPA import permit with an attached list of permitted species (all of which are in Appendix II or are non-CITES species), and import is allowed only from sources that are approved by the Marine Aquarium Council. For all CITES-listed specimens imported into Israel with a valid Israeli import permit, the CITES permit issued by the country of export is examined at the point of entry into Israel.

**Note:** Purpose and Source codes (see below) are provided only for import permits for species listed in Appendix I.

### **Exports and Re-exports**

The table of Export and Re-export Permits includes all permits issued for the export or re-export from Israel of CITES-listed species for which specimens were actually exported or re-exported. However the quantity of Corals and Flora (plants) in the table is estimated. The table includes the CITES description code (following the Guidelines for the Preparation and Submission of CITES Annual Reports (No. 2010/013 of 17 June 2010) and a textual description, the number of the Israeli export or re-export permit, the quantity exported or re-exported, the ISO code of the destination country, the ISO code of the country of origin of re-exports (which in most cases is the country of last export), and the Purpose and Source codes (see below).

**Note:** Only Re-export permits have a country listed in the column "Country of origin of re-exports"; for Export permits this column is left blank.

## **CITES Purpose and Source Codes currently in use**

Codes for Purpose of trade, from Resolution Conf. 12.3 (Rev. CoP15)

<b>Purpose Code</b>	<b>Description</b>
T	Commercial
Z	Zoo
G	Botanical garden
Q	Circus or traveling exhibition
S	Scientific
H	Hunting trophy
P	Personal
M	Medical (including biomedical research)
E	Educational
N	Reintroduction or introduction into the wild
B	Breeding in captivity or artificial propagation
L	Law enforcement / judicial / forensic

**Codes for Source of specimens in trade, from Resolution Conf. 12.3 (Rev. CoP15)**

<b>Code</b>	<b>Description</b>
<b>W</b>	Specimens taken from the wild
<b>R</b>	Ranched specimens: specimens of animals reared in a controlled environment, taken as eggs or juveniles from the wild, where they would otherwise have had a very low probability of surviving to adulthood
<b>D</b>	Appendix-I animals bred in captivity for commercial purposes in operations included in the Secretariat's Register, in accordance with Resolution Conf. 12.10 (Rev. CoP15), and Appendix-I plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 4, of the Convention
<b>A</b>	Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP15), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III)
<b>C</b>	Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5
<b>F</b>	Animals born in captivity (F1 or subsequent generations) that do not fulfill the definition of 'bred in captivity' in Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof
<b>U</b>	Source unknown (must be justified)
<b>I</b>	Confiscated or seized specimens (may be used with another code)
<b>O</b>	Pre-Convention specimens

## Table of Imports to Israel - 2009
