Israel's Annual Report for 2002 on Trade in Species Listed in the Appendices of The Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES)

Prepared by
Simon C. Nemptzov for Israel's Scientific Authority
and Ety Sabag for Israel's Management Authority

This report consists of two tables of data from Israel on imports and exports/re-exports of species listed in the appendices of the CITES convention, for 2002.

Israel's trade policy necessitates an import and export permit from the Israel Nature and Parks Authority (INPA) for all wildlife and for all protected species imported into the country (even non CITES-listed species). In addition, the INPA issues official CITES permits for the import of Appendix I listed species, and for export or re-export of all CITES-listed species.

For the first time, Israel is submitting a summary of the actual quantity of animals imported and exported, as opposed to all previous annual reports, in which only the number of animals that were approved in the permits, was provided (the quantity of Flora in the table is estimated). The data in the tables were provided by the permit-holders and were approved by INPA inspectors. Comparison of the trade data for 2002 with those of previous years, shows that the number of specimens in actual trade in 2002 was **far** lower than the numbers reported in previous annual reports. As we had suspected, these data show us that previous annual reports greatly over-estimated levels of actual trade. We found that in many cases, only one-tenth (or even fewer) of the number of specimens approved were actually imported.

The Table of CITES Imports (Page 3) includes all permits issued for the import to Israel of CITES-listed species for which specimens were actually imported (the quantity of the plants in the table is estimated). The table includes a description, the quantity imported, the ISO code for the country exporting to Israel, the number of the Israeli import permit, and the codes used for the Source and Purpose. **Note:** Where the Description is left blank, this refers to live animals. **Note:** Only import permits for species listed in Appendix I include Purpose and Source codes. (see below)

The Table of CITES Export and Re-Export Permits (Page 8) includes all permits issued for the export or re-export from Israel of CITES-listed species for which specimens were actually exported or re-exported (the quantity of the plants in the table is estimated). The table includes the type of permit (export or re-export), a description, the quantity exported or re-exported, the ISO code of the destination country, the number of the Israeli export or re-export permit, the ISO code of the country of origin of re-exports (which in most cases is the country of last export), and the codes used for the Source and Purpose. **Note:** Where the Description is left blank, this refers to live animals.

CITES Source and Purpose Codes

From Res. Conf 10.2 (Rev) and Res. Conf 11.16

Res. Conf 10.2 (Rev) recommends that Parties state, on each of their permits and certificates, the **purpose** of the transaction using the following codes:

- T** Commercial trade
- Z** Zoos
- G** Botanical gardens
- Q** Circuses and traveling exhibitions
- S** Scientific
- H** Hunting trophies
- P** Personal
- M** Biomedical research
- E** Educational
- N** Reintroduction or introduction into the wild
- B** Breeding in captivity or artificial propagation
- L** Enforcement

The following codes are to be used to indicate the **source** of the specimens:

- W** Specimens taken from the wild
- R** Specimens originating from a ranching operation. (Resolution Conf. 11.16 states: 'ranching' means the rearing in a controlled environment of specimens taken from the wild)
- D** Appendix-I animals bred in captivity for commercial purposes and Appendix-I plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 4, of the Convention
- A** Plants that are artificially propagated in accordance with Resolution Conf. 11.11, paragraph a), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5, of the Convention (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III)
- C** Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5, of the Convention (specimens of species included in Appendix I that have been bred in captivity for non-commercial purposes and specimens of species included in Appendices II and III)
- F** Animals born in captivity (F1 or subsequent generations) that do not fulfill the definition of 'bred in captivity' in Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof
- O** Pre-convention
- U** Source unknown (must be justified)
- I** Confiscated or seized specimens
